**Subject:** M6H1 - Harvey Response EN update 9/1/17  
**Date:** Friday, September 1, 2017 3:58:59 PM

---

EN has worked with HQ to prepare no action assurance letters for fuel distribution (covering loading racks and terminals, as well as trucks, railcars and marine vessels without approved vapor certification, etc.) for TX and LA to assist with the fuel shortages resulting from the disruption caused by the hurricane. Draft letters are prepared - we received documentation from LA earlier this afternoon and received details from TX at 3:45 pm. Tx also requested NAA for refineries and distribution facilities for landing their floating tank roofs on the tank legs. The NAA letters for the vapor requests should be issued by cob today. R6 is working with HQ to finalize the letter for the tank landing.
